LOWELL TEXTILE SCHOOL. OCTOBER 30, 1919

No. 2

## TEXT NEWS BOX

### A SYMBOL

A box has been put in the lower corridor with the name of the TEXT on the outside. Just because this name is on the outside do not think that it belongs to the Text, for we take this opportunity of presenting it to the school and hope that good use will be made of it. We believe it to be a symbol representing student opinion, for it is thru its use that we hope to gain your viewpoint on the topics of vital interest to us all. Articles, jokes, etc., are most acceptable. Therefore when you think you have some material we should all see, just slip it into the box, and altho we cannot guarantee that it will be published, we will give your efforts very careful consideration.

### SUBSCRIPTIONS

By the time, this paper reaches you, you will probably have decided whether or not you will subscribe to the paper. We hope that you will subscribe as we want to get a subscription from every fellow in school. It is only thru a large number of subscriptions that we can have a bigger and better TEXT. It is not too late to pass your name in now. If you have not signed up yet put your name in the TEXT mail box. Get the habit of using the box. The Alumni are back of us 200 strong. LET'S BEAT THEM AND PUT THE LIST IN SCHOOL UP TO 250.

## Students Pay Additional Athletic Fee

At a recent meeting of the student body, the facts concerning the finances of our A. A. were put forth very plainly. Altho the usual athletic assessment of five dollars would enable the present football schedule to be carried out, there would not be much left over for baseball, the reason for this being that new equipment had to be bought for the entire football team. Thus it became plainly evident that to have a baseball schedule an additional amount of money would have to be raised. Also the more money put in back of baseball the better chance there would be of playing teams of our own class. It was then pointed out that \$3.00 from each student

*Continued to Page 6.*

If you did not take the trip there is no reason now, why you should not pay your \$3.00 assessment.

## Second Smoker Proves An Enjoyable Party

Last Wednesday evening the Textile Athletic Association entertained the students with its second smoker. About one hundred and twenty-five men were present, and an enjoyable evening was spent. The "smokes" were of good quality and the committee seemed to have judged quite capably the quantity needed. The same is just as true concerning the refreshments.

After Mr. Lupien spoke a few words to the students, Mr. R. L. Brown, a returned "Battery F" boy, addressed the fellows: He said in part:

"I usually connect funny stories with speaking, but when I was asked to speak I became too scared to joke. Perhaps, at first, facts about the training at the French artillery school at Saumur, Maine et Loire, will be interesting to you. It was one of the greatest cavalry schools in Europe. The Kaiser and his son, many other notable people, and men from West Point have attended it. During the war the French have used it as an artillery school. When the United States entered the war, they had their eye on it. After some negotiations, it was finally obtained. The idea at first was to send fellows from Plattsburg and other training camps to this artillery school. The course was very strict and intensive, but very interesting. The high officers were all French. The instructors were second lieutenants. All forms of photography for discovering enemy positions, etc., were given by well-informed French officers.

"A very interesting fact is why the Germans destroyed the cathedral at Rheims. They give as an excuse that the French used the tower as an observation post. I know that four French officers with their hands on the Holy Bible swore that the French never used any part of the cathedral for military purposes, so you can see how much truth there is in this excuse.

"The French had everything figured out very accurately and carefully. They knew just how many rounds of ammunition they could use a day, just how many guns were being made and used up a day, and just how fast the man power was decreasing, before the United States was able to help.

"Perhaps it would be interesting to you if I told something of camouflage. For example, there were a certain number of guns in a sector, and the Ger-

mans knew just how many. The Germans would not waste their large shells in trying to destroy the French "75's." The thing to do was to make the Germans think there was a whole battery where there wasn't any. One piece, called a roving piece, was taken from a battalion and assigned to a sector. A sector is about four miles wide. This piece changed position every two days, for it took the Germans two days to think there was a battery where there wasn't any. This piece fired a hundred rounds a day, and the Germans were really fooled. They used a large amount of ammunition in destroying these "large batteries."

"At Soissons we had to occupy a position which had previously been destroyed by the Germans, so they knew the exact spot. We moved in at night. We found that our pieces were too small for the gun pits, and we had to

*Continued to Page 6.*

## Interclass Football

### WINNER TO HAVE NUMERALS PUT ON CUP

Hurrah! Everybody up for the revival of inter-class football. In the next two weeks there are going to be two grand and glorious battles on the campus. In the first game on Monday, November 3rd, the Sophs and the Freshmen battle. One week later the Juniors and Seniors do the comeback stunt. The following Monday the two winners play to see who puts their numerals on the cup which was given to the school by the Textile Christian Association last year for the promotion of inter-class athletics. 1921 had their numerals put on for being the baseball champions. Who are the football champs? The following are the statements of the different teams:

The Seniors: "Quality not quantity is what counts."

The Juniors: "We will use science and not brute force, look out for our corps of drop kickers."

The Sophs: "We possess the punch."

The Freshmen: "Our battle cry is, REMEMBER SEPTEMBER 29, REVENGE IS SWEET."

IT'S A GO!!! PICK YOUR WINNER.

## Alumni News

Frank Gainey, '11, who was technical expert for the National Analine and Chemical Company at Buffalo, N. Y., was actively interested in the exhibit of that concern at the Chemical Exposition recently held in Chicago, Ill. While there he reports of meeting J. C. Wood, '09, C. Brainerd, '18, and Mr. David Nelson of the Sears Roebuck Company, who is a former student of Textile.

R. R. Sleeper in a recent letter wished to be remembered to all his friends at Textile.

Harry S. Adams, '05, has been recently appointed treasurer of the Eureka Cotton Mills of Chester, S. C.

Frederick E. Chamberlin, '03, died recently at his home in Ayer, Mass.

A. J. Anderson, '19, and C. L. Brainard, '19, are with the Waldrich Bleach and Dye Works of Delawanna, N. J.

Raymond R. Stevens, '19, is assistant colorist for The Felters Co., at their plant in Millbury, Mass.

F. E. Gooding, '19, is with the Hooker Electro Chemical Co. of New York City as a technical expert.

Word has been received from Verner Sjoström who is now located in Patson's Woolen Mill, in Sherbrooke, Quebec. His work he writes is very interesting and instructive. We were very much pleased to know that the gassing received "over there" has had no real serious results.

Levinstein, '21, is in business for himself, having started a haberdashery store in Middletown, Conn.

### Contributed by an Alumnus

The following is something every Textile student should know from memory. It has been sadly lacking from Textile functions of the last few years, and should be revived once again.

### ALMA MATER

Alma Mater forever,  
Textile sons have naught to fear,  
Alma Mater forever,  
Give her boys three rousing cheers,  
Rah Rah! Rah!  
We will never forsake her,  
All thru life adore her,  
Firm as adamant she stands, united as  
of yore,  
The Red and the Black boys  
FOREVER MORE.

## A TEXTILE ORCHESTRA

Ask any fellow, if he does not think that we need a school orchestra to put more life into our smokers, and other social events, and he will say we do. Therefore, if it is a unanimous opinion that such a thing is a dire need, why should we not have one? In "ye olden days," according to the pictures in the library, L. T. S. not only had an orchestra, but a mandolin club, and a glee club. Has Textile gone backward or forward? Is there not as much interest along such lines today as there was ten or fifteen years ago? Is it possible that out of two hundred and seventy-five fellows, we cannot find enough with musical ability to form an orchestra that can play better than any of those of the earlier days of L. T. S.? We believe that such a group can and should be gotten together as soon as possible.

Some fellows will say that this proposition sounds well on paper, but it takes lots of time and practice to accomplish anything in the line of music. This alibi will not hold water however, if you just stop and think. Does it not take lots of time and practice to develop a foot-ball team, a base-ball team, or any other team to represent the school? Do the fellows who possess the ability to take part in these sports offer this as an alibi? No! Never! If they did you all know, that we would not have a very high opinion of them. Now the same thing holds true of a fellow who has musical ability, and has not got

spirit enough to devote some of his time in practice for the benefit of the school, and we hope there are not many fellows here of that caliber.

The TEXT will guarantee that this is not the last time you will hear of a TEXTILE ORCHESTRA, for we have not got this off our mind for nothing.

## Notes of Interest to the Textile Chemist and Dyer

## BRITISH DYESTUFF SITUATION

British authorities propose to take under the terms of the peace treaty only such German dyestuffs as cannot be obtained or made in Great Britain, and in the importation of these a rationing scheme will be employed, the provisions of which will be applicable to individual firms as well as to the countries of the associated powers.

The British Government has made strenuous efforts to build up the dye manufacturing industry in this country and has subscribed for £1,700,000 (\$8,273,000) worth of the stock of the British Dyestuffs Corporation, a £10,000,000 concern, which has just been formed to exploit and co-ordinate the dye industry of Great Britain. Concerning this new corporation, the London Times said recently:

"The issue of the long-expected prospectus of the British Dyestuffs Corporation, signaling the completion of the amalgamation, should have an almost immediate good effect on output. The constant negotiations and debates have been unsettling and have interfered with work to some extent. Now there is nothing to interfere with the steady routine of research and actual production, and progress may be expected at a greatly increased rate. With all the advantages of amalgamation there will still be a healthy rivalry. Blackley will vie with Huddersfield, and it is all to the benefit of the color consumer that there should be this inter-departmental competition." —Consul General Hollis, London.

## TWO NEW DYES

The National Aniline & Chemical Company, Inc., announces the production of two new dyes, known as Erie Yellow Y and Wool Blue C. B.

Erie Yellow Y is a direct color practically identical with the pre-war type, Chrysophenine, and fills a big gap in the line of direct colors. It is of value not only as a cotton color, but also as a color for wool and union goods.

Wool Blue C B is identical with the pre-war color Azo Wool Blue C, and similar to Azo Acid Blue B. It is of special value in the dyeing of worsted goods with silk effects, as it leaves silk white when dyed with Glauber's Salts and acetic acid. This is the first bright blue of a reddish shade manufactured by the National. It will also find extensive use on yarns and ladies' dress goods.—"Textiles."

## Textile Holds Strong N.H. State Team to Score of 12-2 in a Poorly Officiated Game

On Saturday, October 25th, the Textile eleven accompanied by a good-sized following of the faithful black and red fans, invaded Durham, N. H., and gave worthy battle to the fast N. H. State team. Although we lost to the tune of 12-2, it was a grand fight all the way, and Textile by its notable showing has once and for all convinced its followers that we are "in" the college class. Had the officials been altogether competent, and impartial, the score would have been closer, and victory might have been perched on Textile's standards.

The game started when they kicked to Marker on the 10 yd. line, who brought the ball back 25 yds. On the next play we fumbled, and they recovered it. On the first play they gained 10 yds., but on the next two failed to gain an inch; Stevens getting the tackles. Schwarz

intercepted a forward pass, giving us the ball. Marker gained thru the line. After an unsuccessful forward pass, Stevens punted. After being thrown for a 10 yd. loss, they tried two unsuccessful passes, and then attempted a punt. Lombard blocked it, and fell on it, but being out of bounds, was given back to them. We were then penalized unfairly for pushing. Precourt and Wentworth threw them back for a 5 yd. loss. Leavitt, their left end, received a long pass, and netted 40 yds. before being downed by Marker. Our line held them for three downs, but on an end run, they made the distance. Stevens held them for the next two downs, followed by an incomplete forward pass. They attempted a drop kick, but it was blocked.

## Textile -- N. H. State Game

Continued from page 3.

The ball was given us on the 20 yd. line. Walker and Wentworth made first down for us.

## Second Quarter

Wentworth ripped their line for 5 yds. Our first break came when we tumbled and lost nearly 20 yds. and lost the ball on downs. Stevens and Lombard stopped them for the first two rushes. They then gained and made a questionable first down, followed by their first touchdown, on which they missed the goal.

We received, Marker bringing the ball from the 15 to the 35 yd. line. Walker and Wentworth each gained, followed by an incomplete pass. Stevens gets off a 40 yd. punt, which they fumble and Lombard recovers. Wentworth and Walker gain 5 yds. followed by an incomplete forward pass. Stevens gets off another 40 yd. punt; Scott nailing the man on our 8 yd. line. They punt for 60 yds. and Marble brings it back 40 yds. Marker and Walker gain eight yards, but we then lost the ball on downs. They were penalized 15 yds., putting the ball mighty near our goal line. They fumble behind the goal line; Scott falling on the ball for what should be a touchdown, but the referee called it their ball, making it a touch-back.

The ball was given them on the 20 yd. line. Scott got them for a 3 yd. loss and they punted for 50 yds. which Marble brought back to the 40 yd. line. They intercepted a pass, giving them the ball on the 50 yd. line. They gain thru the line, followed by a successful 30 yd. pass. After two incomplete passes, Walker intercepts their third try, which he romps down the field for 35 yds. A pass fails and the half ends.

## Second Half

Schwarz kicks off to their 10 yd. line, which they rush back 20 yds. Stevens making the tackle. They gain 20 yds. around end, Walker getting the man. Pierce stops runner after a 5 yd. gain. Lombard holds them on the next down, followed by a gain for first down. Marker stops them after a 15 yd. gain, followed by two no gains, and they were penalized 10 yds. Cochran replaced Goosetry, and blocks their attempted line plunge, aided by Stevens. Marker intercepted a forward pass on the 28 yd. line. Pierce gains, but we were penalized 10 yds. for pushing. Stevens punts. They gain 9 yds., but on the next play, Stevens throws them for a 8 yd. loss, giving us the ball on downs.

Marker gains, followed by a 10 yd. pass Marker to Stevens. Pierce and Marker gain thru the line, followed by a 10 yd. pass Marker to Walker. The quarter ends after an incomplete pass; our ball on the 38 yd. line. Cockroft replaces Schwarz at right guard. We get first down on a 5 yd. penalty. Marker gains 2 yds. On a pass Marker to Stevens we get 9 yds. Marker makes first down again on three rushes, but we then lost the ball on downs. They gain 7 yds. in two tries. Goulet replaces Berry. Stevens then stops their line plunge.

Lemere relieves Scott, and they make 9 yds. thru center, and first down

around the end. On three rushes they make first down again, followed by a 20 yd. forward pass; Walker getting the man. He also got the next on an attempted end run. Cochran and Stevens each stop them on the next two rushes. Goosetry relieves Cochran, but is put out of game for not entering at the beginning of quarter. Cochran returns, but is put out, and we are penalized 1-2 distance to the goal line for putting back a withdrawn man; Fontain, a back, taking the position. They gain 12 yds., and then 8 yds. for the second touch-down, but the kick-off fails. Marble kicks off, the ball bounding to their eight yd. line. Goulet gets the man on the 22 yd. line. After making 4 yds. they are thrown for a loss by Fontain. There was but 2 min. to play. After an incomplete pass, they punt 30 yds. to Marker, who recovers 10 yds. Miller replaces Fontain in the line, the latter replacing Walker in the back-field; and Mott relieving Marker. After Fontain gains 4 yds. they intercepted a pass, but were nailed in their tracks by Lombard.

The game then ended.

The features of the game were the superb playing of Stevens and Lombard, the line plunging of Walker and Wentworth, and the all around playing of Marker.

The line-up and summary:

N. H. STATE	LOWELL
Leavett, Lundholm, le	re, Berry, Goulet
Gadbois, lg	rg, Lombard

Ostnes, head linesman and timer. Time,	
four 12 min. periods.	

SIDELIGHTS ON THE  
N. H. GAME

In one of the frequent wrangles over whether or not the necessary distance had been made in the four downs, the would be officials were reminded that an engineer's scale is far more accurate than a farmer's scale.

Textile's ROYAL ROOTERS numbered about twenty-five, but they made more noise in proportion, than all the hundreds of N. H. rooters.

One thing noticeable in N. H. cheering was a BAND. May the day come when L. T. S. will have one.

The referee tried to show our "Lupe" where he was wrong, but he picked on the wrong man for "Lupe" held up his end of the argument without difficulty.

We would suggest that they teach the students up there how to put some grass on their athletic field. Their playing field has nothing on ours.

Taking everything into consideration N. H. was lucky to win.

If you did not take the trip there is no reason now, why you should not pay your \$3.00 assessment.

# New Bedford Evidently Not In Textile's Class

## L. T. S. 33—New Bedford 0

"Lupe" guessed right: the score was close at the start. New Bedford Textile our would-be rival had hopes that were quickly shattered. The features of the game were, the long passes by Stevens, the catching of the same by Berry, the rushing of Marker and Walker, and the defensive playing of Lombard, Precourt and Stevens.

Textile won the toss and received. Stevens, our giant tackle got the ball on the 25 yd. line and carried it back 12 yds. From here on, it was a steady advance. Our line ripped huge holes in the visitors' line, thru which our backs made first down repeatedly. Our advance was halted on the 18 yd. line when New Bedford recovered a fumble. Our line seemed a little high, and New Bedford went thru twice for first down. On a delayed pass, they gained 15 more yards, putting the ball on our 40 yd. line, but here it stopped when our line refused to be moved, and New Bedford lost the ball on downs. Marble punted and it bounded by their backs and went behind the goal. After being brought back on the 20 yd. line, the quarter ended.

### Second Quarter

It was New Bedford's ball on the 20 yd. line. They made two small gains, and then a 15 yd. run, but again found themselves confronted with a stone wall, and lost the ball on downs. Marker made a series of brilliant rushes and brought the ball to the 3 yd. line. Walker carried it over on the next play. The score then stood 6-0, as we failed on the kick out.

Lombard kicked off to the 20 yd. line and the runner was nailed in his tracks by Goulet. They were thrown back twice for a loss and then punted to Marker, who ran it back 10 yds. by clever dodging. Walker and Marble gained 8 yds. and Goulet caught a 20 yd. forward pass from Stevens, and carried it 20 yds. more. Marker took the ball 15 yds. for our second touchdown. We failed on the goal. Score 12-0.

Lombard kicked off to the 20 yd. line. On the next two scrimmages, Lombard and Stevens broke thru and caught New Bedford for a loss. The half ended before we pushed them back over their own goal.

### Second Half

Lombard kicked to the 20 yd. line, and then tackled the receiver. Capt. Precourt tackled New Bedford for a 15 yd. loss, on an attempted end run. They tried twice, unsuccessfully to gain. Then, punted 50 yds. to Marker, who ran it back 10 yds. A 10 yd. pass from Marble to Marker followed by a 4 yd. rush, put the ball in a good position. A pass failed and resulted in a touch-

back, giving them the ball on the 20 yd. line. Precourt twice throws them back for a 5 yd. loss. They then net 15 yds. on a delayed pass, and then loose the ball on downs. Walker and Marker make 7 yds. Stevens then gets off a 40 yd. pass to Berry for a touchdown, who makes a sensational catch. Capt. Precourt kicked the goal. Score 19-0.

New Bedford received on 20 yd. line but failed to gain.

### Third Quarter

Jack Goosetry who relieved Capt. Precourt caught them for a loss on the first scrimmage. They failed to gain and on the next play Tom Cochran broke thru and throw them back for a loss. They then punted to Mott. Fontaine gained 5 yds., followed by a 6 yd. gain by Mott. Snyder went around end for 7 yds. more. First touchdown was gained by Mott. Fontaine and Wentworth each gained 7 yds. Stevens then pulls off a 40 yd. pass to Berry, and the goal was kicked by Wentworth. Score, 26-0.

On the kick-off Jack Goosetry nailed the runner in his tracks, despite interference. Lombard intercepts a forward pass. Band gains 6 yds., Goldman 4 yds., Wentworth 8 yds., Fontaine 6 yds. and then 5 yds. Goldman goes thru tackle for 3 yds., and Wentworth carries the ball over. Wentworth kicks the goal. Score 33-0.

Textile kicks off to their 8 yd. line. They gain 4 yds., but were thrown back for a 2 yd. loss. Jack Goosetry throws them back for a 5 yd. loss on the next play. They punt to Band who rushes the ball back 10 yds. A forward pass failed. Whistle blows, ending game.

The line-up and summary:

LOWELL	NEW BEDFORD
Precourt, J. Goosetry, le	re, Jewell, Collins
Stevens, Miller, lt	rt, Peterson
A. Goosetry, Cochran, lg	rg, Brownell

Score: L. T. S. 33, New Bedford 0. Touchdowns: Walker, Marker, Berry, Wentworth 2. Goals from touchdowns: Precourt, Wentworth 2. Referee: Serriev. Umpire: Neeson. Head Linesmen, Ogden and Neff. Field Judge: Sweet. Time: 12 and 15 min. periods.

## Third International Cotton Conference

Nearly one hundred English and Continental cotton spinners and manufacturers arrived in New York on September 23 en route to the Third International Cotton Conference, which opens in New Orleans on October 13. The European delegation was headed by Sir Herbert Dixon, chairman of the Fine Cotton Spinners' and Doublers' Association, which operates about 7,000,000 spindles. The secretary of the delegation is Frank Nasmith, editor of the Textile Recorder, and in the party is Arno S. Pearse, secretary of the International Cotton Federation. There are in the delegation representatives of the cotton trade of England, France, Belgium, Switzerland. After visiting Boston and a number of mills and machine shops in New England the visitors will proceed to New Orleans where an elaborate program has been arranged for the Conference.

### Object and Purposes of Conference

For several years the conviction has steadily been gaining ground that the producers and manufacturers of cotton, both at home and abroad, were facing far-reaching, drastic changes which would involve profound alterations in every branch of the industry. The war has served to emphasize this conviction and to clearly point out that the successful solution of the problem demands the exercise of statesmanship and economic foresight of the highest order. Never has the industry been confronted with more momentous economic questions than those with which it now has to deal in the co-operative adjustment of its many-sided affairs as a result of conditions into which the exigencies of war and post-war have thrown it.

Going still farther back: no essential industry having to do with a commodity of such value and importance as cotton is in greater need of reforms in the methods in vogue of handling its product. During this transformation cotton passes through many hands and undertakes long journeyings. A generation of precedent is responsible for an uncoordinated and unscientific method of operation. It is the sincere hope and belief of the promoters of the World Cotton Conference that it can and will do much to clarify the situation and bring about practical, satisfying solutions of these problems.

We of the United States had become accustomed to look upon cotton as our own product, our monopoly, something with which we could do as we pleased, forgetting the fact that monopolies carry obligations as well as benefits to their possessors.

Because American cotton has always been ginned, sampled, compressed, baled, financed, warehoused, and transported according to ancient and antiquated methods is no reason why these practices should continue; is no reason why modern methods should not be introduced.

Because cotton is ginned, compressed, graded and baled according to different standards in every country that grows the staple is no reason why the pro-

ducers and handlers in the different countries should not get together and adopt uniform standards that would mean so much to the consuming trade.

Because cotton is now grown in something of a haphazard fashion throughout the cotton producing world, without system or regard for the world's needs at the particular season, thus producing a glut or a scarcity at times, is no reason why the growing of the staple could not be allocated to some central committee among the producing countries with due regard for the special needs of the particular season.

It is for a discussion of these features from a world viewpoint that the cotton conference at New Orleans is to be a World Cotton Conference.—Cotton.

## Lowell Textile Whips Dean Academy

Hard Fought Contest Resulted in  
Score of 12 to 6 and a Scrap  
Among the Players.

In a game that ended in a free for all scrap, Lowell Textile beat Dean academy yesterday at Franklin by the score of 12 to 6. From the outset of the game Dean showed its scrappy disposition and was frankly out to beat up the local college team. Textile started to play a slow, careful game following closely the plays ordered by Coach Hudson but with the first scrimmage Dean showed its idea of football and then Textile's went out to beat them at their own game.

Lowell started the game by kicking off to Dean and Stevens placed the ball on their 30-yard line. Dean rushed down the field making two first downs on off tackle and end plays. Unable to make any more ground through the line Dean pulled off a forward pass and scored their only touchdown when Schaffer got over the line with William's forward. They failed to kick the goal and the first period ended with Dean ahead 6 to 0.

With the beginning of the second period Lowell started to use the tactics adopted by Dean and managed to keep the ball in their opponents' territory the whole quarter. The ball was kept in motion without either team gaining much ground and the period ended without either team scoring.

Lowell kicked off again at the start of the third period and Dean was stopped in its tracks. Unable to make her distance Dean punted and Stevens jumping into the air blocked it. The ball went in back of Dean's goal line and Morrill fell on it for Textile's first touchdown. Lombard failed to kick the goal and the period ended with the two teams tied.

Dean had the ball at the start of the last quarter and for several minutes the ball was carried back and forth across the field. Finally Dean lost the ball on downs and Textile carried the ball to the 60-yard line. With only a couple of

move them outside. We moved two pieces in broad daylight, and while we were doing it, a German airplane flew over. Two nights later I was on guard watching for rockets when the Germans opened fire on us. I beat it out of the observation post, and went below with everyone. The airplane had taken a picture and the Germans had figured out our position very accurately. They had fired two hundred shells in twenty minutes.

"Perhaps some of you know Mahlon Dennet. I was with him when he was wounded. We had been out walking near the front line looking for unexploded gas shells, or "duds." He was very tired then and had wished for a small "blighty," so that he could get a good rest. About three-quarters of an hour later he was back in camp reading, when a "77" landed at his feet. Both of his legs and arms were horribly torn up and his stomach was seriously injured. He lived two days after that.

I could go on telling you incidents about the war, but I do not want to take any more of your time now, and I feel quite sure that Mr. Webster has a few very interesting stories to tell you."

After Mr. Webster had spoken to the fellows, Mr. Lupien introduced Mr. Wesley Keough, who graduated from Textile in 1910, and who is now in the flying game on his own hook. Mr. Keough had just returned from Canada where he had purchased a Curtiss plane, in which he had flown back to Lowell.

Mr. Keough told some of his experiences since the outbreak of the war, at which time he was employed in the Mohair Plush Company. At the declaration of war between the United States and Germany, Mr. Keough left the Mohair Plush and went to the officers' training school in Plattsburg, from which place he later received his commission. From Plattsburg he went to Kelley Field, Texas, where he was appointed a flying instructor. From Kelly Field, he was transferred to Rockville Field in San Diego, Texas. Mr. Keough failed to get across the water due to his needful presence in instructing flying cadets.

Mr. Keough told of many amusing incidents, one of which was as follows:

A new cadet was trying to make a landing and in so doing had misjudged the distance considerably. As a result, when he glided to the ground, he was only a few feet from a railroad track. Not being able to stop his machine, the machine struck the tracks, bounded into the air and landed on top of the commandant's automobile. The recruit was immediately discharged from the flying school.

Refreshments were served, following Mr. Keough's talk and a "get-together" hour was pleasantly spent.

## Alumni Notes

Continued from page 1

The following is taken from a letter recently received by a L. T. S. alumnus: for each alumnus.

"It might be interesting to state that in my travels I have run across one or more L. T. S. men each week, and the majority of these men are holding positions from that of Mill Superintendent to that of Treasurer or President of a company. One is indeed impressed with the large part the L. T. S. plays in the textile industry and it further brings one to a realization of how very much the L. T. S. has done and is still doing for each alumnus.

"You will pardon this digression from the subject, but there are times when my enthusiasm bubbles over a little bit, and I have to speak about it to relieve the tension.

Very truly yours,"

A letter recently received here from "Pup" Gould, '19, contained a good bit of news of other Alumni. Gould has been recently transferred from the Champlain Silk Mills Whitehall, N. Y., to F. C. Huyck & Sons, manufacturers of paper makers' felt and cloth for overcoatings. He reports:—

J. C. Standish, '11, as Superintendent of the plant.

Tracey Colby, '16, is also with this company.

A. N. Davieu, '13, is working in one of their branch mills in Canada.

Elmer Mathews is with the Swansdown Knitting Co. of West Sandlake, N. Y.

Warren H. Whitehill, '12, formerly of the Pacific Mills, Lawrence, Mass., has recently accepted a position as color chemist with The National Aniline and Chemical Co. of Buffalo, N. Y.

### MR. R. R. SLEEPER, '00, ACCEPTS NEW POSITION.

It was with great regret that the upper classmen, on returning to school, learned that Mr. Sleeper was among the missing. He always took an interest in the fellows, and was one of the most active members of the faculty in booming the social and athletic doings of the students. It is the sincere wish of all the old students, that success attend him not only in his present position but in all future undertakings.

(Through an oversight this failed to be printed in our first copy.)

### PAPER CLOTH IN SPAIN

The British Vice-Consul at Granada, Spain, states that a local firm has erected a factory in which it is intended to manufacture thread from paper and to weave cloth from it for the packing of

their products. The necessary raw material is obtained from eucalyptus wood, of which tree the company has a large plantation. The process of its manufacture is described as follows:—From wood paste paper is made which is cut in long narrow ribbon-like strips. These are wound on reels and are placed in a spinning frame the spindles of which make 5,000 to 6,000 revolutions per minute. In this process the twisted paper forms a tube of little strength. It is now soaked in a special glue which becomes insoluble when exposed to hot air, and considerably increases the strength of the yarn. The thread is then stretched to obtain the necessary firmness, but is too coarse to be woven into a substitute for either linen or cotton cloth.—Textile Mercury.

### STUDENTS VOTE TO PAY ADDITIONAL FEE FOR ATHLETICS.

Continued from page 1

would readily accomplish this object. The matter was then put to a vote and passed unanimously. Next came the matter of collection. It was thought advisable to have this money collected by class representatives, and the following men were chosen:

Freshman Class: Sect. A, H. C. Carragher; Sect. B, S. W. Hall; Sect. C, W. S. Lawler; Sect. D, T. P. White; Sect. E, E. F. Potter; Sect. F, L. Wilcox.

Sophomore Class: Hillman, Worthen.

Junior Class: Sweet, Washburn.

Senior Class: Brainard, Forsaith.

By the time this paper is out it is hoped that every one of the fellows will have paid this fee and indicated in this way that he wishes to have his name in back of L. T. S. on the athletic field. If you have not paid yet, seek out your collector, and get it off your mind. It will also remove a lot of wasted energy on his part in looking you up.

MAKE A RUN FOR TEXTILE NOW BY PAYING YOUR BIT.

## Textile—Dean Game

Continued from Page 5.

minutes to play Stevens dropped back to kick the ball out of danger. The play was faked and Stevens made a perfect pass to Captain Goulet at left end. Goulet tore down the field a 30-yard gain and was dropped two feet outside Dean's goal in what looked to be a touchdown. With less than a minute of play left the teams lined up with Dean in back of her own goal. As the play started Dean went off side. Marble, playing quarterback, carried the ball over the line and made the touchdown. While the play was in motion time was called. Then the argument started.

After the play Textile refused to accept the penalty for Dean's being ogside and claimed the touchdown. Coach Sullivan of Dean claimed that his team should be penalized one-half of the distance to their goal line but as the acceptance of the penalty according to rule is optional, Lowell refused it and demanded an opportunity to kick the goal. The umpire and referee were undecided about the play and Textile was not permitted to kick the goal. Players from both teams got into the argument and came to blows and the fight stopped only when the players went to their dressing rooms. The touchdown was finally allowed and Lowell Textile won 12 to 6. The unsportsmanlike spirit shown by Dean academy will result in her being taken off Textile's schedule in future for the local school has a reputation for clean athletics.

The lineup of the game was:

TENTHLE	DEAN
Precourt, le	le, McCann
Stevens, lt	lt, Paten
Goosetry, lg	lg, Keefe
Scott, c	c, Barrows
Cockroft, rg	rg, Krause
Lombard, rt	rt, Coleman
Goulet, Morrill, re	re, Shaffer
Snyder, Marble, qb	qb, Hatch, Muller
Pierce, lhb	lhb, Richers, Williams
Marcher, fb	fb, McKay
Williams, rhb	rhb, Dufour, Kelley
Score: Lowell 12, Dean academy 6.	
Touchdowns: Morrill, Marble, Shaffer.	

**Uniformity** is the keynote of successful Bleaching and Dyeing of goods in string or roll.

Hunt Improved Reel Machines are accomplishing this result in the leading mills of the country.

Your problems can be solved by Hunt Engineers and Hunt Machines designed and built to suit your conditions.

**Pioneers.** Hunt Reel Machines have "blazed the trail" for nearly half a century.
